CAREER SUMMARY

I am a frontend developer specialising in software development. Creating complex, scalable web apps and focusing on writing clean, elegant and efficient code. My main focus is React + Typescript. On a personal level, I am highly motivated, result-oriented, self-driven, hard-working and constantly seeking to improve my skills.

WORK EXPERIENCE

Frontend Developer

Symposium OU

Nov 2022 - Present

Working on a full life cycle of a product, from architecture design to implementation and production support with the primary focus on user interfaces and integrations with backend services. Participating, collaborating in various Agile meetings to ensure that the entire team is on the same page.

Achievements:

Prototyping new features, meeting business needs and solving challenging technical problem. Working in un autonomous team of developers using React JS.

- Contributing to the definition of the future state of the system architecture
- Participate in the design of new systems & services features
- Implement & maintain software built in JavaScript and TypeScript
- Major role in designing & implementing UI changes built in React (primarily)
- Collaborate with the development team, Quality Assurance, and Support

Technologies used:

AWS, Apollo Client, TypeScript, JavaScript, React, Next, GraphQL, Jest/Cypress

Frontend Developer (Intern)

Pharmaspectra, an IQVIA buisness

Jun 2022 - Oct 2022

Working with the UI/UX designer and BAs to bridge the gap between design and technical implementation. Taking an active role on both sides and defining how the applicationd.

Achievements:

Building reusable UI interfaces with React, TypeScript, Styled components and Storybook using Atomic design principles.

- Meeting all client requirements by writing clean and elegant code solutions
- Developing web applications using React Hooks, Next.js and Apollo Client
- Writing unit and integration tests with Jest, React testing library and Cypress

Technologies used:

JavaScript, React, TypeScript, Jest/Cypress, Storybook, Styled Components

Frontend Development (Boot camp)

Kodiri.com

Aug 2020 - Jan 2021

Six months (800+ hours) of intensive training in a variety of modern programming languages and technologies. Collaborating to build and deploy a front-end application that fulfils provided specs. Integrating and utilizing functionality from third-party API's following best practices.

Technologies used:

HTML, CSS/Sass, JavaScript, Node, REST API, Webpack, Babel, MVC

SKILLS & TOOLS

Frontend

JavaScript

TypeScript

React.js

Node.js

Next.js

Gatsby.js

GraphQL

HTML/CSS/SASS/LESS

Others

Express · Git · Unit Testing · Contentfull · Figma · MongoDB · Storybook · Airtable

EDUCATION

BEng Civil Engineering
University of Transport Sofia
2004 - 2009

Industrial electronics
High School of Electronics
2003

LANGUAGE

English (Professional)

Bulgarian (Native)

INTERESTS

Swimming

Walking
